

LABORATORY TESTING POLICY

We would like to inform all of our patients that a portion of your laboratory testing for fertility services will be performed by:

Arizona Advanced Reproductive Lab, LLC (AARL)

AARL does not hold contracts for reimbursement purposes with the various insurance plans. However, the majority of insurance plans will reimburse for testing done through AARL. For those patients whose insurance coverage does not allow testing in our lab, we will make every effort to send your specimens to the designated reference lab (Lab Corp, Sonora Quest), with the exception of the hormone tests.

There are certain hormone tests that must be performed by AARL for infertility treatment due to the quality and consistency of the results as well as rapid access to these results. The following tests, if ordered, WILL be performed by AARL:

FSH, Estradiol, LH, Progesterone, and BHCG.

In addition to these, ALL andrology services (male testing including **Semen Analysis and IVF Sperm Testing**) will be performed by our certified andrologist.

Finally, all laboratory procedures done in connection with a fertility treatment such as IVF, IUI, Ovulation Induction will be performed by AARL.

For **ALL** AARL services, FULL PAYMENT will be collected prior to or on the day of service. We will be happy to supply you with a statement for your insurance company for your reimbursement purposes.

I have read the above information and understand the policy in regards to AARL.
